Important Information

- This trek requires a good level of physical fitness, as it involves long walking days, uneven terrain, and gradual ascent at higher altitudes. Participants are strongly advised to prepare in advance through regular exercise, endurance training, and hiking practice.
- Altitude-related illnesses such as Acute Mountain Sickness (AMS) can occur above 2,500 m. All itineraries are designed with proper acclimatization days to minimize risk; however, individuals must follow the guide's instructions and report any symptoms immediately. If symptoms worsen, descending to a lower altitude is mandatory for safety.
